## Bio Traubensaft Bag in Box

Weingut	Dopler GmbH
Kategorie	Most
Inhalt/Menge	5 l

The grape juice cure has been used as a medicinal and preventative for centuries. The grape juice contains various essential minerals, potassium, fruit acids, tannins, glucose and vitamins A, B and C. The blood is cleaned by a grape juice cure, and waste products are gently removed from the body. It helps to prevent acidity, regulates digestion and reduces the accumulation of fat and fluids in the body for a long time. The juice also helps with inflammatory changes in the digestive organs. The body is supplied with vital substances and you feel fresh and vital immediately after a complete cure. The grape juice cure strengthens the organism and makes it more resistant. You can of course intensify these effects with our grape seed oil and grape seed flour. Grape juice cure: Start the cure with 0.75 l and increase to 1.5 l per day. The grape juice cure should not be extended beyond 2 weeks. A real elixir of life to start the spring in a fit and strengthened state.
