Contents	0.75 liter
Alcohol level	13 vol%
Vineyard site	Ost
Closure	Natural cork
Soil	Marl
Drinking temperature	10 °C - 12 °C
Aging ability	1 years - 5 years

Vine with roots in France, a bud mutation of Pinot Noir, which has found in Friuli an ideal breeding ground, and one of the world famous wines from our region. The grapes are immediately separated and pressed and cooled down to a temperature of 14 ° C. With a subsequent gentle pressing, the separation of the must from the skins takes place the natural decantation follows. Fermentation takes place in temperature-controlled stainless steel vats. The bottle aging takes place for 3 months. From bright straw-yellow color, fruity in the nose and the palate, full-bodied, velvety, with a good structure, pleasant aftertaste. An ideal companion to fish entrees, consommé, rice with vegetables and fine egg dishes.
